DETAILED ACTION

Specification

The disclosure is objected to because of the following informalities: Page 7 line 26 reads "to form a near field pattern" and the reader is then referred to see figure 2. This is confusing in that pg.8 lines 6-7 also disclose elements of figure 2 as being in the far field. It is thus believed that the line "to form a near field pattern" should read "to form a far field pattern", or elements of figure 2 should only be referred to with regard to near field or far field and not both.

Appropriate correction is required.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claim 1 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 6618417.

Although the conflicting claims are not identical, they are not patentably distinct from

each other because the claims in the current application are broader than the claims of patent '417 and hence '417 then outlines an existing embodiment of the claims of the application under review.

Claim 1 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 6560260 in view of Hayashi et al. (US 5960019). Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims in the current application are broader than the claims of patent '260 and hence '260 then outlines an existing embodiment of the claims of the application under review with the exception that '260 does not disclose the ridge waveguide semiconductor laser diode to comprise facets. Hayashi et al. (US 5960019) teaches the use of facets in a semiconductor laser device (col.11 line 11). It would have been obvious to one of ordinary skill at the time of the invention to combine the ridge waveguide device of '260 with the facets of Hayashi in order to provide feedback and form a cavity suitable for proper laser oscillation.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US 5022036 and US 5394424 that speak of changing output beam characteristics via changes in upper cladding thickness.

Art Unit: 2828

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tod T. Van Roy whose telephone number is (571)272-8447. The examiner can normally be reached on M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Minsun Harvey can be reached on (571)272-1835. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
